

Math 1553 Worksheet §1.2, §1.3

1. a) Circle the 'operations' that are legal to use in row reduction, in other words, the operations that will not change the solution set of an arbitrary linear system.

(1) $R_2 = R_3 + 4R_2$

(2) $R_1 = R_2 - R_3$

(3) $R_2 = R_2 + (R_1)^5$

(4) $R_3 = R_3 - \ln(R_2)$

- b) These are row operations only. Try performing a column operation: for example, try doubling any column in $\left(\begin{array}{c|c} 1 & 1 \end{array} \right)$. What happens to the solution set?

2. a) Which of the following matrices are in **row echelon form (REF)**? Which are in **reduced row echelon form (RREF)**?

- b) For the matrices that are in **REF** or **RREF**, which entries are the pivots? What are the pivot columns?

$$\left(\begin{array}{ccc|c} 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & 0 & 1 \end{array} \right) \quad \left(\begin{array}{cccc|c} 1 & 1 & 3 & 1 & 1 \\ 0 & 0 & 4 & 2 & 2 \\ 0 & 0 & 0 & 3 & 3 \\ 0 & 0 & 0 & 0 & 4 \end{array} \right) \quad \left(\begin{array}{ccc|c} 1 & 2 & 1 & 3 \\ 0 & 0 & 0 & 2 \\ 0 & 1 & 1 & 2 \\ 0 & 0 & 0 & 0 \end{array} \right)$$

- c) How many nonzero entries are there in a pivot column of a matrix that is in **RREF**?

3. Each matrix below is in RREF. In each case, determine whether the corresponding system of linear equations is **consistent**, and if so, how many solutions does it have?

$$(a) \left(\begin{array}{ccc|c} 1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & 0 & 1 \end{array} \right), \quad (b) \left(\begin{array}{cccc|c} 1 & 1 & 0 & 0 & 0 \\ 0 & 0 & 1 & 0 & 0 \\ 0 & 0 & 0 & 1 & 7 \end{array} \right), \quad (c) \left(\begin{array}{ccc|c} 0 & 0 & 0 & 0 \\ 0 & 0 & 0 & 0 \\ 0 & 0 & 0 & 0 \end{array} \right)$$

4. Find the **parametric form** for the solution set of the following system of linear equations in x_1 , x_2 , and x_3 by putting an augmented matrix into reduced row echelon form. State which variables (if any) are free variables. Describe the solution set geometrically.

$$\begin{aligned} x_1 + 3x_2 + x_3 &= 1 \\ -4x_1 - 9x_2 + 2x_3 &= -1 \\ -3x_2 - 6x_3 &= -3. \end{aligned}$$
